DC	Anacostia Trash TMDL lawsuit	In response to an adverse court decision in March, 2018, EPA, MD and DC are required to develop replacement TMDLs for trash in the Anacostia watershed in cooperation. EPA published a solicitation for trash data within the Anacostia watershed in the federal register and accepted data through October 23, 2018. Data was received from 7 parties, including among others, D.C. Water, Montgomery County Department of Environmental Protection, and the Alice Ferguson Foundation. EPA is currently working to review and analyze the wealth of data in preparation for continued coordination with the jurisdictions.
